

RUST-OLEUM® WIPE NEW SYNTHETIC WAX SYSTEM

DESCRIPTION AND USES

Wipe New Synthetic Wax System by Rust-Oleum® is a revolutionary wax using electrofusion technology to protect your vehicle's surface for up to 3 years. Wipe New wash creates positive ions that bond with the negative ions in the wax to form a durable, protective layer.

The complete, single use kit includes a concentrated Wipe New Deep Cleaning Wash, the Wipe New Synthetic Wax, a soft foam applicator and a microfiber towel. Wipe New protects your vehicle from UV rays, pollution, moisture and more through the seasons with the ultimate Synthetic Wax System.

PRODUCT FEATURES

- High gloss finish
- Extreme water beading
- Protects from fading & contaminants
- Dust & dirt repellency
- Protects for up to 3 years

370563	Wipe New Synthetic Wax
349514	Soft Foam Applicator
308006	Microfiber Towel

PRODUCT APPLICATION

READ ALL DIRECTIONS BEFORE BEGINNING PROJECT

APPLICATION

STEP 1. WASH

Shake well. Pour entire bottle of Deep Cleaning Wash into a gallon of water. Wash car with sponge or clay bar. Leave wash on vehicle's paint for approximately 15 minutes to ensure positive ions adhere to the negative ions in the Synthetic Wax. Rinse and dry vehicle.

PRODUCT APPLICATION (cont.)

APPLICATION (cont.)

STEP 2. WAX

In the shade, apply several dabs of Synthetic Wax to the included applicator pad. For detailed instructions, see diagram below. Do not buff off immediately, wax needs time to fuse to your car's clear coat. The wax will tell you when it's time to remove by changing from white to a hazy, translucent white.

NOTE: More wax isn't better – a little product goes a long way. As you wait for the wax to fully fuse, move onto the next painted panel.

STEP 3. SHINE

Once the wax has turned to a hazy, translucent white, buff off with the included microfiber towel. Continue until your entire vehicle is waxed and buffed to a shine.

FOR BEST RESULTS

- Must use Deep Cleaning Wash together with synthetic wax to achieve maximum protection
- Pre-clean with a clay bar and apply compound to fill and remove scratches
- **DO NOT** use on plastic trim or flat paints
- **DO NOT** use automatic car wash- wash vehicle by hand with a pH neutral car wash solution to maintain longevity
- Use a Wax and Tar Remover to remove wax from your vehicle's paint
